

GANZ RESEARCH REPORT

- During 2020 we have contributed to Frank Staemmler's project to gather and produce a document showing the subject matter of all published Journal papers on Gestalt Therapy. We produced a spreadsheet of all the published articles and their authors in GANZ Journal from its inception in 2004 to 2020.
- A pilot program for single case studies of gestalt therapy and unipolar depression has been devised with the help of Jan Roubal and Margherita Spagnuolo Lobb and will run from January to April 2021.
- It is our further intention support our members and other practitioner researchers to participate in this project and to expand the project to be both national and international. We intend to publish the data to contribute to the research already undertaken by other Gestalt therapists in Europe and South America on this topic.
