

## Membership Report

15-Nov-2020

As you will see, our Membership in 2018 was around 180 members, and now we sit at 132. A considerable drop.

I think an important point to consider is the current Council's intention to re-invigorate GANZ, and to ensure that our membership is attractive and useful for our members. We are taking exciting steps in this direction.

The new and changing field, including the directions Melbourne's Gestalt Centre, the International Gestalt DOTs Institute, the P.D.s offered by GTB (to name a few) are taking means that doors are opening for the connecting of Gestalt practitioners locally, around Australia, New Zealand and globally. As has the move to a more digital means of workshops, therapy. The online process groups we have run are a testament to this, as are the contributions to our newsletter from people internationally, and the contact with our facebook page.

My hope is that as we become more co-ordinated, and as all the groups and Institutes work together, that membership to GANZ continues to be of value to our members.

Aicha Brogan.
